Table 1. Investment and output on a common sample

アウトカム	Output	
項目	OLS projection	IV response
	(1)	(2)
Investment	2.0898	1.8321
	(0.0249)	(0.0440)
Initial productivity	0.3488	0.4602
	(0.0418)	(0.0459)
Constant	0.0390	0.0672
	(0.0391)	(0.0409)
Observations	1200	1200
Controls	Initial productivity; constant	Initial productivity; constant
Excluded instrument	None	Investment incentive z
Covariance	HC1	Robust; debiased
Official estimator	statsmodels OLS	linearmodels IV2SLS

括弧内は保存された標準誤差。
Both models use the same 1,200 producer IDs and equal observation weights.
Investment slopes are in output units per investment unit. Standard errors retain each estimator's saved covariance.
